

Vihit Khetle

Dublin, Ireland +353 899837791 vihitk05@gmail.com linkedin.com/in/vihitk05 github.com/Vihitk05
Eligible for Irish Graduate Work Permission (Stamp 1G) upon course completion

Professional Summary

MSc Computer Science (Data Science) candidate at Trinity College Dublin with 14+ months of internship experience building data pipelines, REST APIs, and production-grade systems. Proficient in Python, SQL, PostgreSQL, and cloud deployment, with hands-on project experience in ETL workflows, ML model integration, and data-driven application design. Strong foundation in SCRUM, version control, documentation, and collaborative cross-functional delivery.

Education

Trinity College Dublin MSc in Computer Science (Data Science)	Sep 2025 – Aug 2026
Dwarkadas J. Sanghvi College of Engineering, Mumbai BTech in Information Technology with Minor in Data Science CGPA: 8.61/10 (First Class Honours equivalent)	Nov 2022 – Jun 2025

Experience

Altiss Advance Technologies Pvt. Ltd., Mumbai <i>Python and Django Developer Intern</i>	Jun 2024 – Nov 2024
- Built and maintained scalable data services and REST APIs using Django and PostgreSQL for a B2B logistics platform; contributed to ETL workflows, data documentation, and release management runbooks in an Agile SCRUM team. - Optimised SQL execution plans and indexing, reducing query response time by 30%; implemented RBAC, input sanitisation, and data security protocols compliant with organisational standards.	
Telkes Technologies Pvt. Ltd., Bangalore <i>Full Stack Developer Intern (Remote)</i>	Feb 2023 – Mar 2023
- Built full-stack web applications end-to-end using Django, JavaScript, HTML/CSS, and MySQL, delivering two client-facing features; refactored queries and introduced caching to improve performance by 40%. - Implemented JWT authentication and RBAC across multiple modules; performed code reviews and supported defect resolution across structured and unstructured data workflows.	
Rivan Solutions, Secunderabad <i>Python Developer Intern (Remote)</i>	Jan 2022 – Jul 2022
- Automated data processing and transformation workflows using Python, reducing manual effort by 5+ hours/week; designed and managed MySQL schemas for reporting pipelines. - Assisted in onboarding two junior interns, conducting code reviews and structured knowledge-sharing sessions.	

Projects

Clover – Full Stack Data Platform <i>Python, FastAPI, React, Next.js, TypeScript, PostgreSQL, ChromaDB, LangGraph, Docker, CI/CD</i>
- Designed and built end-to-end data ingestion, transformation, and storage pipelines structuring live external data into PostgreSQL; exposed results via real-time low-latency query APIs with a Next.js/TypeScript frontend. - Implemented multi-agent LangGraph workflows for automated data analysis; containerised with Docker and deployed via CI/CD pipelines.
CureLinkAI – Healthcare Data Platform <i>Python, Flask, React, MongoDB, Machine Learning, Blockchain (Solidity)</i>
- Built a Flask REST API backend handling sensitive healthcare data with secure role-based access; integrated ML classification models (85%+ accuracy) for real-time disease prediction and medication recommendations. - Designed and managed MongoDB schemas for unstructured health records; applied end-to-end data validation and cleansing practices across ingestion and prediction pipelines.

Research Publications

Advanced Digital Asset Management through Object Detection and Captioning Models – 1st Intl. Conference on Emerging Trends in CS & Engineering
Streamlining Customer Service with DeskPro: A CRM Solution for Startups – Intl. Conference on Advanced Trends in CS & Engineering

Technical Skills

Languages:	Python, SQL, JavaScript, TypeScript, Java, C, C++
Data:	ETL pipelines, data transformation, PostgreSQL, MySQL, MongoDB, ChromaDB, data modelling
ML/AI:	ML classification, LangGraph multi-agent workflows, RAG pipelines, predictive analytics
Backend:	Django, FastAPI, Flask, REST APIs, OOP principles
Tools:	Git, Docker, CI/CD, Postman, Linux, Figma
Cloud:	AWS, Azure (familiar), Render, Netlify
Concepts:	SDLC, SCRUM/Agile, data governance, clean code, system design, technical documentation
